

Parkinson
Disease
Detection

SAYS

- Offers an opportunity to help researchers find better ways to safely detect, treat, or prevent PD
- Early diagnosis and treatment of PD are paramount to reducing the risk of disease progression, limiting the effects of PD on QoL, and potentially lowering long-term treatment costs

THINKS

- Why people lose thoughts during conversation
- Why do people experience slowness of speech, difficulty in remembering names, numbers, etc.
- Can the affected people be identified?

DOES

- Identifies on the basis of voice - PD detection
- Can be diagnosed at early stage

FEELS

- Loss of interest
- Anxious
- Unhappy, frightened and panicked
- Stiff limbs during the day and night
- Severe headaches
